

New Site Start

Contributed by Liang Chen

Hi,

Today my new personal site : www.liang-chen.com start. It is based on Joomla software with some my moderations. And I will fill all the pages and contents within a few of days.

Another news is that, I successfully applied Google Apps for Your Domain which means the emails: webmaster "AT" [liang-chen.com](mailto:webmaster@liang-chen.com) and bigreat "AT" [liang-chen.com](mailto:bigreat@liang-chen.com) are hosted by gmail, the email provider I love most.
